

Have You Been Experiencing High Water Usage?

Being a good water steward reduces water waste. Below are some simple tips to save water.

Inside home common water losses:

- Dripping faucets in the kitchen or bath?
- Toilets that flush themselves or seem to run continually?
- Water softener needs maintenance?
- Consider only running full dishwasher and washing machines.

Outside home common water losses:

- Irrigation timer programming needs seasonal adjustment, battery or maintenance?
- Hoses and bibs that drip or leak?
- Water that puddles or wet spots in yard could indicate a broken water pipe?
- Broken sprinkler heads or miss adjusted sprinkler heads?
- Over watering new sod or plants for establishment?
- Consider installing water efficient drip irrigation zones for plant beds.

Regular homeowner water system maintenance and inspections will reduce water loss and save you money. If you still have questions, your Water Conservation Coordinator may be of further assistance at 407-971-5691.
