

City of Oviedo
Residential Pool / Spa / Hot Tub
Safety Act Requirement

Date _____

Property Address _____

Lot _____ Subdivision _____

In order to pass final inspection and receive a certificate of completion, a residential swimming pool must meet at least one of the following requirements relating to pool safety features. Please select the method(s) to be used:

- The pool will be isolated from access to the home by an enclosure that meets the pool barrier requirements of Florida Building Code, Residential section R4502.17 and Florida Statute 515.29;
- The pool will be equipped with an approved safety pool cover meeting the requirements of ASTM F 1346;
- All doors and windows providing direct access from the home to the pool will be equipped with an exit alarm meeting UL 2017 that has a minimum sound pressure rating of 85 decibels at 10 feet;
- All doors providing direct access from the home to the pool must be equipped with a self-closing, self-latching device with a release mechanism placed no lower than 54 inches above the floor; or
- A swimming pool alarm that, when placed in a pool, sounds an alarm upon detection of an accidental or unauthorized entrance into the water. Such pool alarm must meet and be independently certified to ASTM Standard F2208, titled "Standard Safety Specification for Residential Pool Alarms," which includes surface motion, pressure, sonar, laser, and infrared alarms. For purposes of this paragraph, the term "swimming pool alarm" does not include any swimming protection alarm device designed for individual use, such as an alarm attached to a child that sounds when the child exceeds a certain distance or becomes submerged in water.

I hereby acknowledge that failure to equip a new residential swimming pool with at least one of the above pool safety features required in Section 515.27, Florida Statutes, shall constitute a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083 Florida Statutes.
